Finding the Static URL ("Permalink") for an Article in a Database

1. Locate the link in the information about the article. Depending on the database, it may be labeled “stable URL,” “document URL,” “permalink,” or “bookmark.”

**EBSCO databases:**

Select "Permalink"

To find the link
Gale databases:

Select "Bookmark"

And a new window will open with the link.
ProQuest databases:

Scroll to the "Indexing" section at the bottom of the page

To find the link

Document URL: http://libproxy.doc.edu:2048/docview/1037487961?accountid=28576
2. Copy the permalink. If it does not include http://libproxy.sbcc.edu:2048/login?url= at the beginning, you will need to add this prefix in Step 3.

3. Paste the copied link into your document, webpage, or email. To enable access to the article from off campus, the article link must include the following link at the beginning:

http://libproxy.sbcc.edu:2048/login?url=
